INFORMATION FOR AUTHORS

The *Journal of Experimental Social Psychology* is devoted to the publication of research and theory on social interaction and related phenomena, including social motivation, social cognition, attitude and belief processes, and intergroup and intragroup processes. The *Journal* does not undertake to specify rigidly an appropriate domain of content, but seeks to reflect current significant research and theory relevant to the interests of experimental social psychologists. It is anticipated that most manuscripts accepted will report results of experimental, conceptually based research that advances specific social psychological theorizing. However, other types of papers, such as theoretical analyses, literature reviews, and methodological notes, are also encouraged to the extent that these papers contribute significantly to an understanding of social phenomena. It is expected that all empirical research submitted for consideration will have been conducted in a manner consistent with the American Psychological Association's *Ethical Principles in the Conduct of Research with Human Participants* (1973).

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Experimental Social Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright of the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Contributions and correspondence concerning editorial matters should be sent to the Editor, **Dr. Charles M. Judd, Department of Psychology, University of Colorado, Boulder, Colorado 80309-0345.**

Form of manuscript. Manuscripts must be typewritten, double-spaced on one side of 8.5 × 11 inch white paper. Typescript is preferred, but copies reproduced by multilith or Xerox are acceptable if they are clearly legible and neat. All pages must be numbered. Four copies must be submitted, each copy including all figures and tables. *Page 1* should contain the title of the article, author(s) name(s) (without degrees), affiliation(s), a running title (abbreviated form of title) not exceeding 35 letters and spaces, and the complete mailing address of the person to whom correspondence should be sent. *Page 2* should contain an abstract of 100–200 words, conforming to the style of *Psychological Abstracts.*

Format and style must conform to the conventions and rules given in the 1983 *Publication Manual of the American Psychological Association,* third edition. The organization of the paper should be clearly indicated by appropriate headings and subheadings.

Footnotes should be kept to a minimum. If necessary, they should be designated by superscript Arabic numerals in the text and typed double-spaced on a separate page.

Figures. All graphs, drawings, and illustrations are considered as figures, and must be submitted in finished form ready for reproduction. Illustration in color can be accepted

only if the authors defray the cost. Figures must be numbered consecutively with Arabic numerals in order of mention in the test. All figures must have descriptive legends typed double-spaced on a separate page at the end of the article.

Tables should be numbered consecutively with Arabic numerals in order of mention in the text and typed double-spaced on separate pages. Each table must have a descriptive heading typed double-spaced over the table. Footnotes to tables should be identified by superscript lower case letters and typed below the table. Figures and tables should be planned to fit the proportions of the printed page. Lettering on artwork for which engravings will be made should be large enough to be legible after a reduction of 50–60%.

References should be cited in text by author's name and publication date, e.g., Roe (1983). Literature citations should be arranged alphabetically and typed double-spaced at the end of the article. Journal titles should be written out in full. Please note the following examples.

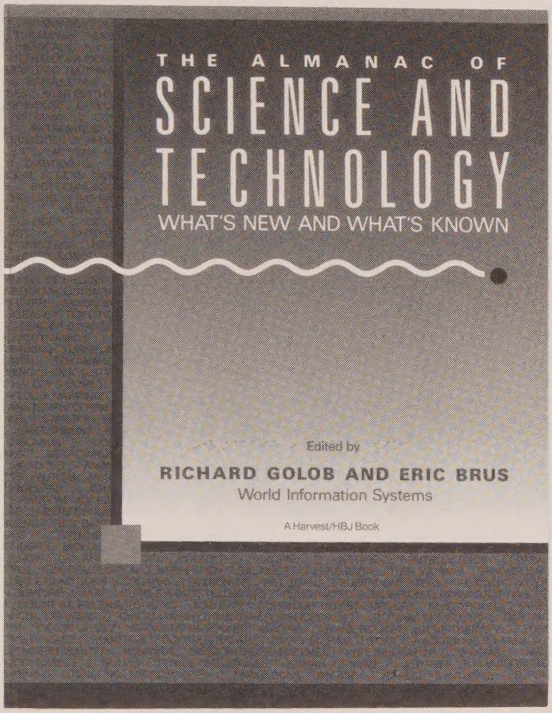
Hamilton, D. L., Carpenter, S., & Bishop, G. D. (1984). Desegregation of suburban neighborhoods. In N. Miller & M. B. Brewer (Eds.), *Groups in contact: The psychology of desegregation* (pp. 97–121). Orlando: Academic Press.

Himmelweit, H. T., Humphreys, P., Jaeger, M., & Katz, M. (1981). *How voters decide: A longitudinal study of political attitudes and voting extending over fifteen years.* Orlando/London: Academic Press.

McGraw, K. M. (1985). Subjective probabilities and moral judgments. *Journal of Experimental Social Psychology,* **21,** 501–518.

Proofs. Proofs will be sent to the author, with a reprint order form. Authors will be charged for alterations in excess of 10% of the cost of composition.

Reprints. Fifty reprints will be provided free of charge. Additional reprints may be purchased; an order form will be included with the proofs.



"The Almanac will have enormous educational value for a wide audience, ranging from high school students to professional scientists. The book is both accessible and comprehensive."

–Jay A. Winsten, Ph.D.
Assistant Dean, Harvard School of Public Health
Director, Center for Health Communication

"An impressively thorough, accessible, and up-to-date guide to the hottest areas in the major fields of science." *–Kirkus Reviews*

"Superb!" –Dudley Herschbach, Baird Professor of Science, Harvard University

Movement, Measures, and Inferences

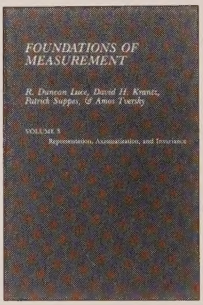
New!

Foundations of Measurement

Volume 3

Representation, Axiomatization, and Invariance

R. Duncan Luce, David M. Krantz, Patrick Suppes, and Amos Tversky



FOUNDATIONS OF MEASUREMENT
R. Duncan Luce, David H. Krantz, Patrick Suppes, & Amos Tversky
VOLUME 3
Representation, Axiomatization, and Invariance

Foundations of Measurement offers the most coherently organized treatment of the topics and issues central to measurement. Much of the research involved has been scattered over several decades and a multitude of journals—available in many instances only to specialists. This volume will be essential reading for professional psychologists, sociologists, and economists interested in measurement questions, and philosophers of science interested in foundations of measurement.

April 1990, 345 pages, $59.50
ISBN: 0-12-425403-9

Human Motor Control

David A. Rosenbaum

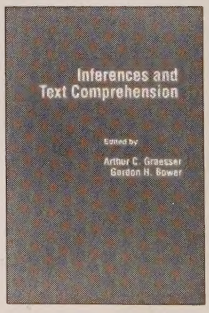
This book is a comprehensive, elementary introduction to the field of movement control. **Human Motor Control** cuts across all disciplines which are defined with respect to movement: physical education, dance, physical therapy, robotics, and so on. The book is unique because it is organized around major activity areas.

This book is:

- ▼ A complete presentation of the field
- ▼ Eminently readable
- ▼ Accessible to undergraduates
- ▼ A compilation of the latest research—each chapter has been reviewed by at least one expert

CONTENTS: Preliminaries. Introduction. Walking. Looking. Reaching, Grasping, and Gesturing. Writing and Drawing. Keyboarding. Talking and Singing. Index.

October 1990/ISBN: 0-12-597300-4



The latest volume in a classic series.

Inferences and Text Comprehension

edited by

Arthur C. Graesser and Gordon H. Bower

Volume 25 of PSYCHOLOGY OF LEARNING AND MOTIVATION

Inferences and Text Comprehension is a systematic exploration of what cognitive psychologists know about the generation of knowledge-based inferences with which individuals comprehend sentences, text, and other forms of connected discourse. The book will be of interest to researchers in cognitive psychology and cognitive science.

In Paperback: $29.95/ISBN: 0-12-531959-2
Casebound: $59.95/ISBN: 0-12-543325-5
May 1990, 340 pages

Measures of Social Psychological Attitudes

Volume 1

Measures of Personality and Social Psychological Attitudes

edited by

John P. Robinson, Phillip R. Shaver, and Lawrence S. Wrightsman

This volume is sponsored by Division 9 of the American Psychological Association: The Society for the Psychological Study of Social Issues.

Do you use attitude and personality measures in your research? Then this is an essential reference book for you. The earlier version, published twenty years ago, could be found on the shelf of virtually everyone working in the field. This book will interest social, clinical, and personality psychologists and sociologists interested in measures of individual differences.

Key Features:

- ▼ Serves as an update and extension of a highly-useful book published twenty years ago
- ▼ Employs a systematic standardized evaluation of 150 scales
- ▼ Chapters on specific types of scales are written by experts in those subfields
